

Stainless Steel Waterless range

- **Urinal Trough**
- **Urinal Pods**
- **Waterless Waste Kits**

A complete range of waterless urinal products from Franke Sissons utilising silicone diaphragm technology to provide waterless solutions for new and existing facilities.

Waterless Urinal Trough

A new design of urinal trough that is purpose made to maximise the flow to the waterless waste fitting and reduce standing fluids to ensure that the product is clean and odour free. Fitted with the unique waterless waste design and diaphragm, urinal slabs are ideal for locations such as stadiums, public houses, nightclubs, public toilets and factories where there is a high frequency of use.

The waterless waste fitting is based on a simple principle of a silicone diaphragm that allows urinal to pass through the fitting but stops odours entering the washroom. The urinal does not need any liquids, gels, scented pads or components to be replaced on a monthly basis for the product to continue to work. The silicone diaphragm insert needs to be replaced at least twice a year, depending upon usage. A fragrance ring is available to fit on the top of the waste fitting if required.

The urinal slab is made from 1.5mm grade 304 stainless steel and is secured with wall brackets and top edge fixings. Waste pipe fitting to the plastic waste fitting is 38mm without the need for a conventional bottle trap.

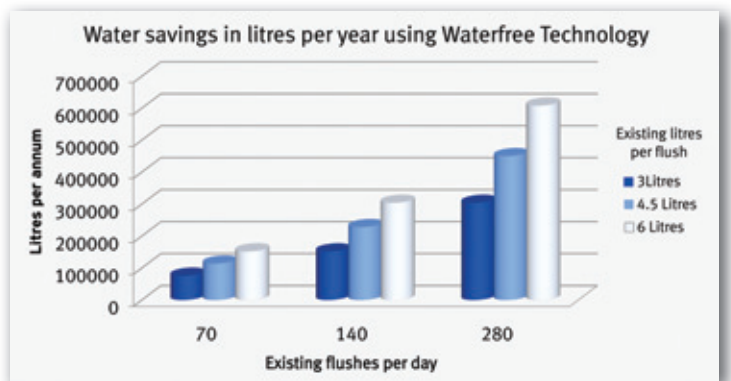

PRODUCT DETAILS

Description

G20125L/R 1200mm Waterless urinal slab with waste fitting
G20126L/R 1800mm Waterless urinal slab with waste fitting

Extras

F1105 Waterless waste insert
F1107 Fragrance ring

Aviva stadium Dublin Project

The recently completed Aviva 50,000 seater national stadium in Dublin was completely fitted with stainless steel waterless urinals. The product was selected to fulfil the design requirements for the stadium to be as environmentally friendly as possible, eliminate water usage, reduce installation times and reduce costs. Each urinal was specially made to suit the layout of the washrooms to enable the maximum number of users at any one time and to comply with the design and functional standards set out by the architect.

Waterless Urinal Pods

Utilising similar technology to the Waterless Slab Urinal, the Waterfree Urinal Pods incorporate a silicone diaphragm in the stainless steel waste outlet. Available in two models to give flexibility of design, both products are made from 1.2mm grade 304 stainless steel and are secured with wall brackets and top edge joggle strips. Waste pipe fitting to the plastic waste fitting is 50mm without the need for a conventional bottle trap.

The silicone diaphragm needs to be replaced at least once a year, depending upon useage.

PRODUCT DETAILS

Description

CMPX532WF Guardian Waterfree Urinal pod
382 x 351 x 617 with waste fitting

CMPX538WF Waterfree Urinal pod
313 x 341 x 732 with waste fitting

Extra

E-CMPX531 Replacement membrane for waterfree urinal pod

Waterfree urinal upgrade kit

The Franke Sissons Waterfree urinal upgrade kit can be used to convert conventional ceramic or stainless steel urinal pods or slabs into a Waterfree urinal by replacing the waste fitting with a diaphragm based waste. The waste fitting needs to be replaced at least twice a year depending upon usage and provides an odourless washroom environment without having to change the waste pipe work or traps. A 40mm waste hole in the urinal is needed.

The water supply to the cistern or flushing valves can be disconnected when fitting the waterfree upgrade kit to eliminate the use of water for flushing the urinals.

PRODUCT DETAILS

Description

F1105P Waterless urinal waste kit for troughs and single pods

F1106 Waterless waste replacement fitting

Microbiological Cleaner for Urinals & Washrooms

To ensure that the urinal is maintained and kept in a hygienic condition it is recommended that they are cleaned with a microbiological cleaner that is sprayed onto the surface and not rinsed so that enzymes in the fluid continue to clean the surface. The cleaner is provided in 1 or 10 litre bottles that are to be diluted in a proportion of 20 parts water to 1 part cleaner.

PRODUCT DETAILS

Description

F1109 Evosan microbiological cleaner 1ltr - makes 21 litre of cleaner

F1110 Evosan microbiological cleaner 10ltr - makes 210 litre of cleaner

F1111 Evosan spray bottle

Approved for use with stainless steel.
